

# MONOSEM

## Precision Vacuum Planters

**Extremely Accurate Seed Spacing** combined with **Uniform Depth Control** puts you on the right path for a very successful growing season.

### **DIRECT SEED PLANTER FOR HEMP**

#### **Hemp Seed Can Be Very Expensive**

That is why the Monosem planter is the right choice. We have decades of experience in the vegetable industry and have taken many of these proven features into hemp planting.

The Monosem metering unit accurately singululates hemp seed. An ejector system directs the seed down the seed tube into the seed furrow where the closing system, designed for shallow planting, creates excellent seed to soil contact.
