

**MONOSEM**  
Enhanced precision

# Ultra-Narrow Row UNR

The Ultra-Narrow-Row planter eliminates the expense of owning multiple planters while adding the benefit of precision planting all your crops. With a planter setup for 10" spacing you can plant on 10", 20", or 30" giving you the flexibility of planting a variety of crops accurately at multiple row spacings.

**Lockup And Ball Valve Shutoffs**  
Optional lockup and shutoff valves can disengage rows not in use. Providing ease of switching from one configuration to different one.

The UNR planter comes standard with a 1.5 BU hopper. An optional 50 BU Central Seed System (CSS) with 1/2 BU hoppers is available and ideal for test plots with small grains such as Hybrid Rice.

**PLANTER SPECS:**  
Row spacing as narrow as 9.5”  
5 to 30 feet  
Staggered rows for residue flow  
Positive drive wheel blocks  
Cat 3 & 4 hitch options

Monosem’s Seed Singulation and Depth Control allow producers to reduce seeding rates and increase profits with hybrid crops.
